

Karthik Saligram

Burlington, ON | 647-897-2971 | karthikvs216@gmail.com | linkedin.com/in/karthik-saligram-17968518b

Professional Summary

Software developer with experience owning full-stack applications across backend services, data pipelines, and web/mobile development. Experienced with AI-assisted development workflows for implementation, debugging, and codebase navigation.

Technical Skills

Languages: Python, JavaScript, TypeScript, SQL
Frontend & Mobile: React, Next.js, Flutter
Backend & Data: Node.js, REST APIs, PostgreSQL, MongoDB, Celery, Redis
Cloud & DevOps: AWS, Azure, Docker, Nginx, GitLab CI/CD
AI-Assisted Development: Codex, OpenCode, Hermes, Graphify, OpenRouter

Professional Experience

Full Stack Developer – Part-time

Ottawa, ON

Orbmedic

July 2025 – September 2026

- Owned end-to-end development and beta readiness of a wearable-health platform spanning backend ingestion, physiological signal processing, web interfaces, and mobile applications.
- Supported a 7-user beta with continuous Polar H10 ECG collection, streaming physiological data from multiple users to the backend for ingestion and processing.
- Designed a sampling-rate-aware, multi-device ingestion pipeline for ECG, PPG, and other wearable signals across varying sampling frequencies, with HRV derived from ECG for downstream analysis.
- Decoupled continuous data ingestion from downstream signal processing using Celery and Redis, allowing processing jobs to run while new sensor data continued to be collected.
- Built clinician-facing React/Next.js interfaces and contributed to Flutter mobile and smartwatch applications integrated with backend APIs and wearable-data workflows.

Full Stack Developer – Independent Contractor

Ottawa, ON

Fair Winds Analytics

April 2025 – March 2026

- Built frontend and backend features for Fleetgress, a deployed operations data platform integrating fleet, labor, material, payroll, and ERP data for reporting and analytics.
- Built the frontend and backend for the AI Insights portal, integrating an LLM-powered natural-language querying workflow with customer data.
- Diagnosed and resolved a production connectivity issue by introducing a reverse proxy, enabling the frontend to securely reach backend services hosted within a private Azure subnet.

Full Stack Developer

Karnataka, India

Manipal Academy of Higher Education

September 2021 – August 2022

- Developed an internal ASP.NET and SQL application used by approximately 1,000 faculty members to track research activity, grants, and PhD supervision.
- Built role-based authentication, authorization, and a points-based faculty evaluation workflow used by faculty, department heads, and administrative users.

Certifications & Achievements

AWS Certified Solutions Architect – Associate (SAA)

September 2024

3rd Place Winner – Discover Technata Cloud Innovation Hackathon, Ottawa

Education

Post Graduate Certificate in Cloud Computing

Toronto, ON

George Brown College

Jan 2024 – Dec 2024

Post Graduate Certificate in Cyber Security

Ottawa, ON

Algonquin College

Jan 2023 – Dec 2023

Bachelor of Engineering in Computer Science

Karnataka, India

Mangalore Institute of Technology

Jul 2017 – Aug 2021
