

Karthik Saligram

Burlington, ON | 647-897-2971 | karthikvs216@gmail.com | linkedin.com/in/karthik-saligram-17968518b

Professional Summary

Full-stack developer with experience building and maintaining production applications, from backend data processing and APIs to frontend development and deployment. AI-assisted development is part of my engineering workflow, helping me navigate codebases, plan implementations, and debug issues.

Technical Skills

AI-Assisted Development: Codex, OpenCode, Hermes, Graphify, OpenRouter

Languages: Python, JavaScript, SQL

Frontend & Mobile: React, Next.js, Flutter

Backend & Systems: Node.js, REST APIs, Celery, Nginx

Databases & Queues: PostgreSQL, MongoDB, Redis

Cloud & DevOps: AWS, Docker, GitLab CI/CD

Operating System: Arch Linux, systemd

Professional Experience

Full Stack Developer – Part-time

Ottawa, ON

Orbmedic

July 2025 – Present

- Optimized AI-assisted development by mapping the codebase with Graphify to reduce token usage and coordinating agents through Hermes for feature planning and debugging
- Built backend pipelines for ECG, PPG, HRV, and other wearable sensor data, including third-party ECG hardware producing 1 kHz signal streams; added load shedding to protect processing services during heavy ingestion.
- Developed algorithms for establishing longitudinal physiological baselines and identifying deviations in wearable sensor data.
- Built clinician-facing interfaces in React/Next.js and contributed to Flutter mobile and smartwatch applications for physiological data collection and visualization.
- Worked with Docker, Celery, MongoDB, Redis, and Nginx across ingestion, processing, deployment, and production debugging.

Full Stack Developer – Independent Contractor

Ottawa, ON

Fair Winds Analytics

April 2025 – March 2026

- Built application features using React/Next.js with backend services in Python and Node.js.
- Developed REST APIs and third-party integrations using OpenAPI, with PostgreSQL for application data.
- Worked with Docker, authentication services, and AWS-based application infrastructure.
- Deployed frontend and backend changes through AWS and GitLab CI/CD and troubleshoot deployment and integration issues.

Full Stack Developer

Karnataka, India

Manipal Academy of Higher Education

September 2021 – August 2022

- Developed an internal ASP.NET and SQL application used by approximately 1,000 faculty members to track research activity, grants, and PhD supervision.
- Built a points-based evaluation system using research outcomes, grant status, and PhD supervision metrics to support faculty performance reviews.
- Implemented authentication, authorization, and SQL-backed workflows for faculty members, department heads, and administrative users.

Certifications & Achievements

AWS Certified Solutions Architect – Associate (SAA)

September 2024

3rd Place Winner – Discover Technata Cloud Innovation Hackathon, Ottawa

Education

Post Graduate Certificate in Cloud Computing

Toronto, ON

George Brown College

Jan 2024 – Dec 2024

Post Graduate Certificate in Cyber Security

Ottawa, ON

Algonquin College

Jan 2023 – Dec 2023

Bachelor of Engineering in Computer Science

Karnataka, India

Mangalore Institute of Technology

Jul 2017 – Aug 2021
