

Karthik Saligram

Ottawa, ON | 647-897-2971 | karthikvs216@gmail.com | linkedin.com/in/karthik-saligram-17968518b

Professional Summary

Software Developer with **1+ year of Canadian professional experience** building backend, full-stack, cloud, and data-intensive applications. Hands-on experience with Python, Node.js, React/Next.js, AWS, Docker, CI/CD, Linux, REST APIs, and hardware-software integration. Computer Science engineering graduate with Canadian post-graduate credentials in Cyber Security and Cloud Computing.

Technical Skills

Languages: Python, JavaScript (Node.js), C#, Dart
Frameworks: React, Next.js, Flutter, ASP.NET
Backend & Systems: REST APIs, OpenAPI, Celery, Linux (Arch Linux), systemd, Nginx
Cloud & DevOps: AWS, Azure, Docker, GitLab CI/CD, Git, GitHub
Databases & Data: PostgreSQL, MongoDB, Redis, SQL

Professional Experience

Full Stack Developer

Orbmedic

Ottawa, ON

July 2025 – Present

- Owned end-to-end development and beta readiness of a wearable-health platform spanning backend ingestion, physiological signal processing, web interfaces, and mobile applications.
- Designed backend data pipelines for ingesting and processing ECG, PPG, HRV, and other wearable sensor data, including integration with third-party ECG hardware producing 1 kHz signal streams.
- Developed algorithms for establishing longitudinal physiological baselines and identifying deviations in wearable sensor data.
- Developed clinician-facing interfaces using React/Next.js and Flutter mobile and smartwatch applications for physiological data collection and visualization.
- Worked with containerized backend services using Docker, Celery, MongoDB, Redis, and Nginx to support production deployment and application processing workflows.

Full Stack Developer

Fair Winds Analytics

Ottawa, ON

April 2025 – March 2026

- Developed full-stack applications using React/Next.js with backend services in Python and Node.js.
- Designed RESTful APIs for data storage, retrieval, and third-party integrations using OpenAPI standards.
- Built production features using PostgreSQL, Docker, authentication services, and cloud-based application infrastructure.
- Deployed frontend and backend services on AWS and implemented GitLab CI/CD pipelines for automated deployment workflows.

Full Stack Developer

Manipal School of Information Sciences

Karnataka, India

September 2021 – August 2022

- Built an internal ASP.NET and SQL academic performance and research management platform for MAHE, used by department heads and research faculty to track grants, research activity, and PhD supervision.
- Developed a points-based evaluation system using research outcomes, grant status, and PhD supervision metrics to support faculty performance, promotion, tenure, and compensation reviews.
- Implemented authentication, authorization, and SQL-backed data workflows for internal faculty and administrative users.

Certifications & Achievements

- AWS Certified Solutions Architect – Associate (SAA)
- 3rd Place Winner – Discover Technata Cloud Innovation Hackathon, Ottawa

Education

Post Graduate Certificate in Cloud Computing

George Brown College

Toronto, ON

Jan 2024 – Dec 2024

Post Graduate Certificate in Cyber Security

Algonquin College

Ottawa, ON

Jan 2023 – Dec 2023

Bachelor of Engineering in Computer Science

Mangalore Institute of Technology

Karnataka, India

Jul 2017 – Aug 2021
